

## Oligo 7 Installation Instructions

Oligo 7 available on our web site, <http://oligo.net/downloads.html>. You may download and install this version on your computer.

### Installation form the Internet

Download the zipped Oligo package, Oligo7Mac\_Installer.zip (Macintosh), or Oligo7Win\_Installer.zip (Windows) to your hard drive. Some systems unpack the files automatically, and some require manual unzipping. Double click on the zip file to unpack the contents.

Double click on the **Oligo7Mac\_Setup** installer package (Mac; sometimes you see the ".pkg" at the end of the name), or on the **Oligo7Win\_Setup** (PC; sometimes you see the ".exe" at the end of the name) to start the installation process, and follow the on-screen instructions. In Macintosh, Oligo is installed in Oligo sub-folder in the Applications folder. In PC, the default folder is C:\Program Files\Oligo 7.

Start Oligo 7, fill out the registration form and register it.

If you need more guidance, the installation process is fully described in the Oligo 7 Tutorial and Oligo 7 Manual that can be downloaded from the same Downloads page.

**IMPORTANT:** Please use Oligo 7 license number while registering Oligo. If you haven't received it yet, please contact us.
